

Call for workshop proposals

We are pleased to invite workshop proposals for the Norwegian Plant Biology Conference 2026

Norwegian Plant Biology Conference

the Norwegian Plant Biology Conference 2026, which will take place in Bodø, Norway, from 19–20 June 2026 (lunch-to-lunch format). This conference brings together researchers, educators, and professionals working on plants, macroalgae, and microalgae, with a focus on molecular biology, physiology, ecology, and biotechnology, as well as their applications in addressing environmental and societal challenges. The conference serves as a platform to foster collaboration, share new knowledge, and strengthen Nordic plant science networks.

Workshop proposals

A full day of pre-conference workshops will be held on Thursday 18 June, with additional half-day workshops offered on Friday 19 June (morning). We welcome proposals for interactive, technical, or thematic workshops covering any aspect of plant and algal biology.

Workshops may be structured as either half-day sessions (~3 hours), or full-day sessions (~6 hours)

Workshop Topics

We encourage formats that promote hands-on activities, collaborative exchange, or training in tools and methods. Topics may include, but are not limited to:

- Phenotyping (in-field, lab-based, or algae-focused)
- Stress adaptation, immunity, and epigenetics
- Plant and algal biotechnology
- Functional genomics and omics data analysis
- Industry-relevant R&D and innovation
- Transferable skills (e.g. communication, data management)
- Novel approaches in teaching and public engagement

We are also open to creative and cross-disciplinary workshop proposals.

Submit your proposal by 1 October 2025

Submission via this form:

<https://nettskjema.no/a/530112>

Scan me!

Workshop organizers will receive free conference registration and will be featured in the programme and on the conference website (launching Fall 2025).

Contact

If you have any questions, please do not hesitate to contact me directly.
With best regards,
